

Small business invited to test innovative ICT products on government problems

We are seeking your help to promote the 2017 Advance Queensland [Testing Within Government](#) (TWiG) program to your members.

TWiG supports small to medium enterprises (SMEs) to improve the positioning of their ICT products by giving them rare access to work within Queensland Government to solve real business problems.

We're looking for SMEs and start-ups that have ICT solutions to the following problems:

- 3D capture of scale models
- Digital asset management
- Digital heritage exploration
- Heavy vehicle rest areas
- Intelligent reporting
- Interactive data visualisation
- Planning and urban design simulation
- Planning for nature
- Secure online learning access
- The patient continuum
- Vision sourcing

An [industry information session](#) is being held on **27 March 2017** and applications close at midday on **18 April 2017**.

We would appreciate it if you could let you members know about the program that was announced by Minister Enoch (see media release titled [Queensland firms to test ICT solutions with Government](#)).

For more information your members can:

- attend the information session
- visit the Advance Queensland TWiG page
- follow us on @AdvanceQld twitter and Advance Queensland Facebook.

Please get in touch if you have any questions.

Kind regards

Matthew Rose
